

Boston Oct. 15, 1857.

My Friend Marsh. I sent you a day or two ago my plate drawings of framing of various kinds and hope they were received. You may keep them as long as you desire as I have no immediate use for them. Such tracings as you wish for your own use, you are quite at liberty to take. If there is anything not there is expressed, if I can aid you, please write to me.

The lithographs are all of them done, and in the hands of Doct. Power. I wrote to Mr. Williams before they were printed to know how many to get (I know not whether you were there, or at B, and hence wrote to him) he wrote, "400 copies," and that more could be ordered if needed. I had that number printed, 20 copies I sent to him, to be distributed among himself, Judge Porter and the Governor (he having agreed to see the Gov. supplied) 6 copies I sent to you, and 12 I retained here. The doctor was set on my hand for copies and as a relief put 60 copies into the book stores. He also thought it to be a good idea to have a few printed on thin paper so that they might be sent by mail, I'm confident of the 60 put in the stores and the 20 thin ones 480 in all have been printed and delivered as above specified. So you see the matter is ended. The doct has them and I presume they will soon be distributed. Mr. Bufford has made out his bill and I tell him to forward it to you
