Head Quarters Camp Griffin ^[1861]
Fairfax County Va. Nov. 25. th

Dear Parents

Your most welcome letter found
Camp Griffin last night and found
the letter than some previous ones though
not in very good strength. The great
peculiarity of the cases of sickness
here seems to be that when the Disease
has left a person it is almost impossible
to regain one's strength. There are those
here Henry Washburn for one had the
measles some four weeks since and
is not able to be out though there seems
to be nothing ailing him but a general
prostration Carlos Carr is another
case though he first had Typhoid
Fever Most of the West Rochester
Boys are unable to do duty though
none of them dangerously sick
That report about two of the West R
Boys being sentenced to be shot for
sleeping on their is like most stories
that go home from Camp that
is entirely false
