Geo P. Marsh Esq

Burlington Vt

Sir Your favor
of 26th ult is received

We are considerably engaged
in the North River Blue Stone business and are in
a position to furnish any kind & quantity of that
article.

We have stone of all sizes though the dimension
you mention is larger than are usually obtained
& the facilities are hardly sufficient for handling so
large stone the thickness varies from 2 to 8 or 10 inches
of all sizes.

We usually sell them as they are dressed
in the Quarry that is worked with what is called
Smooth faces but could have them also worked
or squared - & the edges cut to joint.

Upon the size thickness & the amount of work
done upon them would solely depend the price
& it would hardly be possible to describe the various
kinds sufficiently for you to make up your mind.
