

Montpelier June 16. 1857

Hon. Geo. F. Marsh.

Dear Sir—

In regard  
to the flooring for the entrance  
story I think there will be no  
difficulty in making it all of  
timber, & well raised from the earth  
or rock. From the examination  
which we have thus far been able to  
make, I think there will be no  
difficulty in getting a space under-  
neath it of two feet in most places  
without blasting. We shall provide  
well for the admission of air, & that  
without disfiguring the building.

In haste

L. G. Powers
