Chicago, Oct. 25th / 1862
Mrs. V. G. Barney,

I am glad to be able to say that the Captain seems to be improving, or at least is more comfortable, this A.M. The Dr. says that all that is required is patience and good nursing & I think he has the latter certainly. He is having a slow run of Billious fever & will have to let it take its course. We will do all in our power for him, & I think you need have no anxiety for him.
